

**PexiScore.com**  
Define Assess Shortlist Hire

Thank you for receiving and reading this. We are sure it will bring cheer to your hiring challenges now on!

We at Pexitics have created our proprietary PexiScore (People Excellence Indicator Score) Analytics hiring tool to power **DASH** (Define Assess Shortlist Hire). We would be delighted to have an opportunity to demo our tool to your organisation and showcase the report generated that increases hiring efficiency with 40% lowered costs and time.

**DASH: Define** (Define the job role) **Assess** (scoring the candidate) **Shortlist** (Shortlist your preference) **Hire**  
*All that you do* *Our Pexi TalenTool works here* *You shortlist whom to interview & Hire*

**PexiScore is a scoring algorithm** that generates a composite profile score and assesses job seekers starting with a **JD match** followed by;

**Aptitude Test:** Good for fresher hiring & junior lateral hires.

**Behavior Test:** Must for everyone to help HR understand the candidates' aspirations and motivations

**Functional Skills Test:** JD can be shared with Business Manager to custom-create functional skill questions; both subjective & objective with randomisation logic. Enables testing candidates for on-the-job skills levels.

Also included is a **mono-format single page resume** to simplify resume views.

*The DASHboard further helps to filter candidates across areas like location, gender, salary experience etc.*

*Ensures that the entire pre-hiring process is handled professionally*

*Candidates' job fitment ensured and limit interviews, **saving time and costs over 40%**.*

In the long haul, PexiScore empowers organisations to use **HR Analytics and improve hiring matrices** & build **employee score levels**. Today we have over 500 candidates already enlisted with PexiScore.com, who could fit into job roles for which your organisation is seeking candidates. *We also offer HR Analytics Consultancy & training.*

We request you to consider this a personal invite to a demo of the Hiring tool. To request a demo, visit us at <https://pexiscore.com> or write to me - [reuben@pexiscore.com](mailto:reuben@pexiscore.com) or reach out to me at +91 7349 66 2322.
